

Playground Fences

The new "Jardin Du Luxembourg 2" fences have been designed with three objectives in mind: safety - functionality - aesthetics.

+ Ideas: multi-directional assembly system*

HUSSON adapts its fences to all types of grounds and play areas, and can install fences in a straight line, curved, on a slope, etc.

+ Design: the "Jardin du Luxembourg 2" fences have been designed to harmoniously blend with landscaped areas, parks, playgrounds, cycle paths, jointly-owned properties, etc.

+ Safety: to protect children inside a playground, to prevent animals from entering play areas, to mark off parks and gardens, etc.

+ Technical features:

Arched post made with hot-dip galvanised powder coated steel tubing.

- The panels are 33.7 mm-diameter horizontal tubes with drawn steel reinforcing bars. These panels have received double surface treatment: hot-dip galvanisation and powder coating.
- The structure is assembled with the HUSSON multi-directional* system and special vandal-resistant stainless steel bolts.

Identification

Catalogue	Play Equipment
Range	Solo+
Universe/Theme	Safety
Page	221

Dimensional characteristics

Length	Available in 3 lengths: 700, 1200, 1800
Height (above ground)	Available in 3 heights: 900, 1200, 1500 mm

Materials

Panel	Galvanised, painted steel
Colour	Green RAL 6005*

Standards (tested by an independent laboratory)

NF-EN 1176 Version 2008	Yes
