

Street furniture technical specifications

"LOUNGE" range

Armchair Juliette METAL

JAN-0004

JAN -0004

LOUNGE range:

The LOUNGE range combines the comfort of a cosy living room with the practicality of outdoor use.

+ Ideas: The furniture from the new "Lounge" range is made entirely of steel, a material which is more contemporary than ever: durable, fully recyclable and suitable for all kinds of creative designs.

+ Design: New 2D and 3D laser-cutting techniques allow the creation of a wealth of exciting new patterns and shapes.

+ Quality: The use of openwork steel with a special double surface coating also ensures particularly simple and low-cost maintenance.

Identification:

Catalogue	Street furniture
Range	Lounge
Pages	18

Dimensional characteristics:

Equipment dimensions (LxVxH)	114x760x840 mm
Seat length	74 mm
Seat height	460 mm
Number of places	1
Weight	33 Kg
Armrests	Yes

Material:

Base	Galvanised, painted steel
Seat	Galvanised, painted steel
Back	Galvanised, painted steel

Standard:

NF EN 335-1	NOT APPLICABLE
NF P 99-610	Yes

Installation:

Delivery	Pre-assembled
Fixing type	Foundation bolts/pins (not supplied)

Colour:

Standard base colour *	Azko Futura sanded grey (2500)
Standard seat and back colour *	Azko Futura sanded grey (2500)

* more than 200 shades available on request

Street furniture

+ STEEL

Extremely resistant double coating

All our steel sections feature double-surface coating:

- Treatment 1: hot-dip galvanisation after manufacture (on the inside and outside of the tubes)
- Treatment 2: powder coating (oven-cured powder paint)

This double treatment guarantees optimum protection from corrosion.

+ IRON OR ALUMINIUM CASTING

Efficient method

After being removed from the mould, the cast iron or aluminium parts are stripped, sand-blasted and then coated in oven-cured polyester powder at a temperature of 250°C to form a uniform, protective coat of approximately 100 microns.

+ ASSEMBLY

Stainless steel bolts and screws

For the metal assemblies, we systematically use our special vandal-resistant bolts which cannot be unscrewed without a special HUSSON tool.

For the wooden/metal assemblies, we have also developed a special vandal-resistant stainless steel screw.

+ GUARANTEE

Long-term guarantee

Thanks to the quality of the materials used and to our double surface treatment, our furniture is designed to withstand the harshest climates and vandalism, thus guaranteeing the sustainability of investments.

+ WOOD AND POLYMERS

Many possibilities to meet every requirement

- **Tropical hardwood** ("ironwood"): We have chosen an extremely tough tropical hardwood ("ironwood") for its exceptional resistance and attractive appearance. As part of its sustainable development approach, HUSSON International is committed to using wood harvested from forests which are managed in an environmentally responsible manner.
- **Softwood**: Cheaper than hardwood, the softwood selected by HUSSON International has a very attractive appearance and is the number one choice.
- **Recycled materials**: As part of its sustainable development approach, HUSSON International uses recycled materials for its bench slats and litter bins. The selected materials are extremely stain- and scratch-resistant and reduce maintenance to a bare minimum ==> See "WoodTech" technical specification sheet.
- **HPL** (High Pressure Laminate): Extremely tough and wear-resistant, flame-retardant, volume-dyed, easy maintenance, high pressure laminate. Available with a wooden texture for a beautiful effect.
- **Rotation moulded polymers**: The planter and litter bin tubs and some of the street furniture items are made of polymers, generally HDPE (High Density Polyethylene) or PP (Polypropylene). Rotation moulding technology is used to create mechanically-resistant, volume dyed products with complex shapes.

+ WOOD SURFACE TREATMENT

Environmentally-friendly treatment

(For softwood and hardwood)

To improve the long-term durability of the surface coating, and to facilitate their maintenance, we use a vacuum and pressure surface-coating treatment which enables excellent penetration into the wood.

Results:

- Clearly improved durability
- Extremely easy maintenance
- Environmentally-friendly, solvent-free treatment which is safe for users
