

JEL-0017/JEL-0018

ELLIPSON range:

This range is recognisable by its original lines and harmonious combination of brushed stainless steel and wood. "ELLIPSON" certainly has character!

+ Ideas: In addition to hardwood, "Ellipson" also uses high-pressure laminate (HPL). Brushed stainless steel, passivated after manufacture is also a trademark of the "Ellipson" range. Elegant, durable and easy-maintenance, it is extremely low-cost over the years.

+ Design: "Ellipson" is also distinguished by its modular seats and easily adapts to the requirements of the environment in which it set.

+ Quality: The "Ellipson" range is available with a universal sealing system. Entirely modular, it is fully compatible with all of the range's references.

Reference	Description	Delivery	Foundation
JEL-0017-EQ	Bollard Ellipson 3 permanently attachable	Pre-assembled	Direct concreting
JEL-0018-EQ	Bollard Ellipson 3 in socket	Pre-assembled	Universal system in socket
Identification:			
Catalogue		Street furniture	
Range		Ellipson	
Pages		70	
Dimensional characteristics:			
Bollard dimensions (øxheight above ground)		89x900 mm	
Total height		1200 mm	
Material:			
Structure		Brushed stainless steel	
Top of bollard		Powder coated cast aluminium	
Standard:			
NF EN 335-1		NOT APPLICABLE	
NF P 99-610		Yes	
Installation:			
Delivery		Pre-assembled	
Colour:			
Standard body colour		Stainless steel	
Top of bollard standard colour*		Titanium grey	

* more than 200 shades available on request

Street furniture

+ STEEL

Extremely resistant double coating

All our steel sections feature double-surface coating:

- Treatment 1: hot-dip galvanisation after manufacture (on the inside and outside of the tubes)
- Treatment 2: powder coating (oven-cured powder paint)

This double treatment guarantees optimum protection from corrosion.

+ IRON OR ALUMINIUM CASTING

Efficient method

After being removed from the mould, the cast iron or aluminium parts are stripped, sand-blasted and then coated in oven-cured polyester powder at a temperature of 250°C to form a uniform, protective coat of approximately 100 microns.

+ ASSEMBLY

Stainless steel bolts and screws

For the metal assemblies, we systematically use our special vandal-resistant bolts which cannot be unscrewed without a special HUSSON tool.

For the wooden/metal assemblies, we have also developed a special vandal-resistant stainless steel screw.

+ GUARANTEE

Long-term guarantee

Thanks to the quality of the materials used and to our double surface treatment, our furniture is designed to withstand the harshest climates and vandalism, thus guaranteeing the sustainability of investments.

+ WOOD AND POLYMERS

Many possibilities to meet every requirement

- **Tropical hardwood** ("ironwood"): We have chosen an extremely tough tropical hardwood ("ironwood") for its exceptional resistance and attractive appearance. As part of its sustainable development approach, HUSSON International is committed to using wood harvested from forests which are managed in an environmentally responsible manner.
- **Softwood**: Cheaper than hardwood, the softwood selected by HUSSON International has a very attractive appearance and is the number one choice.
- **Recycled materials**: As part of its sustainable development approach, HUSSON International uses recycled materials for its bench slats and litter bins. The selected materials are extremely stain- and scratch-resistant and reduce maintenance to a bare minimum ==> See "WoodTech" technical specification sheet.
- **HPL** (High Pressure Laminate): Extremely tough and wear-resistant, flame-retardant, volume-dyed, easy maintenance, high pressure laminate. Available with a wooden texture for a beautiful effect.
- **Rotation moulded polymers**: The planter and litter bin tubs and some of the street furniture items are made of polymers, generally HDPE (High Density Polyethylene) or PP (Polypropylene). Rotation moulding technology is used to create mechanically-resistant, volume dyed products with complex shapes.

+ WOOD SURFACE TREATMENT

Environmentally-friendly treatment

(For softwood and hardwood)

To improve the long-term durability of the surface coating, and to facilitate their maintenance, we use a vacuum and pressure surface-coating treatment which enables excellent penetration into the wood.

Results:

- Clearly improved durability
- Extremely easy maintenance
- Environmentally-friendly, solvent-free treatment which is safe for users
